

Performance Summary

The Income Portfolios use leading ETFs from **Vanguard, iShares, ProShares, and Direxion:**

- Income (INC):** 30% Global Equity (VT) & 70% Long-Term Treasuries (TLT)
- Income 1.5x (INC 1.5x):** 23% S&P 500 2x (SSO), 52% LT Treas. 2x (UBT), 25% ST Treas. (SHY)
- Income 3x (INC 3x):** 30% S&P 500 3x (UPRO) & 70% Long-Term Treasuries 3x (TMF)

Growth of Initial \$1,000 (16.3 Years Since 1/00)

Additional Information

**Note:** All of the performance data is over 16.3 years since 2000. Conservative estimates were used for underlying ETF performance prior to their inception. Worst year is based on worst calendar year. YTD year-to-date. Hypothetical historical performance reflects annual rebalancing and excludes transaction costs. Past performance does not guarantee future results.

**ETF Portfolio Management (ETF PM)** is a revolutionary financial advisor specialized in investing with exchange-traded funds (ETFs). We customize active and passive investment portfolios, for a wide range of clients, at an ultra-low-cost. Client accounts are held at Schwab and other custodians may be available upon request.

| Performance       | Income | Income 1.5x | Income 3x | S&P 500 |
|-------------------|--------|-------------|-----------|---------|
| Total Return      | 235%   | 271%        | 984%      | 90%     |
| Annualized Return | 7.7%   | 8.4%        | 15.7%     | 4.0%    |
| Worst Year        | -5%    | -11%        | -30%      | -37%    |
| Annual Returns    | INC    | INC 1.5x    | INC 3x    | SPY     |
| 2016 YTD          | 5.8%   | 9.0%        | 17.2%     | 1.7%    |
| 2015              | -2.1%  | -4.5%       | -11.4%    | 1.4%    |

**General Information**

The Income Portfolios (INCs) are comprised of leading ETFs from Vanguard, iShares, ProShares, and Direxion. The performance estimates for the INCs relate to a range of hypothetical core models, strategies that David Kreinces first backtested in 2016. These portfolios do not take into account an individual's investment objectives and financial circumstances. Consult your investment adviser before investing.

Mr. Kreinces was solely responsible for the development of all three INCs and he had full discretionary authority over the selection of investments. The **Income (INC)** portfolio is 30% Global Equities (VT) and 70% Long-Term Treasuries (TLT).

Mr. Kreinces modified the **Income 1.5x (INC 1.5x)** to be 23% S&P 500 2x (SSO), 52% Long-Term Treasuries 2x (UBT), and 25% Short-Term Treasuries (SHY).

Mr. Kreinces further modified the **Income 3x (INC 3x)** to be 30% S&P 500 3x (UPRO) and 70% Long-Term Treasuries 3x (TMF).

**Performance Estimates**

The performance estimates reflect performance that would have been achieved by a hypothetical account with annual rebalancing. The performance estimates are backtested and have not been audited. Conservative estimates were used for underlying ETF performance prior to their inception. The performance estimates do not reflect trading fees associated with annual rebalancing, and assume reinvestment of dividends.

**The performance estimates for all of the INCs are net of a 0.25% annual advisory fee.** Each ETF PM advisory account is solely responsible for all advisory fees, commissions and other transaction charges, as well as any charge relating to the custody of securities in such account.

Backtesting involves simulation of a quantitative investment model by applying all rules, thresholds and strategies to a hypothetical portfolio during a specific time period. The investable benchmark performance estimates do not reflect the returns of actual client accounts. Backtested performance does not represent actual trading and does not reflect the impact that material market factors might have had on ETF PM's decision-making.

*Historical performance estimates are not indicative of future performance.* The investment return and principal value of an ETF PM account will fluctuate and may be worth more or less than the original cost when liquidated. The investment environment and market conditions may be markedly different in the future and investment returns will fluctuate in value.

The INCs were implemented, and will continue to be implemented, with a view towards low-cost diversification across multiple asset classes. The performance estimates presented are for comparison purposes only. All of the information in this report was taken from sources which we believe to be reliable, but we cannot guarantee perfect accuracy.

**Leveraged ETFs**

Leveraged ETFs do not deliver their exact multiple of the underlying index. On a regular basis, leveraged ETF returns may deviate materially from the underlying index multiple they target. Investors should not use leveraged ETFs without careful consideration, an appropriate asset allocation, and a disciplined risk control framework.

**S&P 500**

SPY is an ETF for the S&P 500 Index. The S&P 500 Index is an unmanaged index of common stocks that represents the U.S. stock market. The index is mainly comprised of large cap companies and reflects roughly two-thirds of the total domestic stock market value. SSO is an ETF that targets the S&P 500 2x, and UPRO has a 3x targetx

**Treasury Bonds**

TLT is an ETF for 20+ Year Treasury Bonds. UBT targets this asset class 2x, and TMF tracks it 3x. IEF is an ETF for 7-10 Year Treasury Bonds, TIP tracks Treasury Inflation Protected Securities, and SHY tracks Short-Term Treasury Bonds.
