The Investable Benchmarks are an important starting point for all investors. ETF PM's first growth benchmark is an efficient multi-asset class (eMAC) portfolio based on David Swensen's recommendation in "Unconventional Success." Swensen's performance managing Yale University's multi-billion dollar endowment fund is leading Wall Street in many respects and his views have significantly broadened the industry's perception of proper diversification.

**Absolute Return Strategies**

ETF PM also specializes in disciplined ETF trend following. The firm provides a dynamic range of strategies that seek to deliver positive returns in all market environments. The firm's trend following strategies delivered gains in the crash of 2008, and ETF PM focuses on hybrid portfolios that combine trend following with indexing.
